

الف) ۳:۵۴

$(30 \times 3) + (1 \times 4) + (\frac{54}{6}) = 153^\circ$

ب) $|5/5M - 30h| =$
 $|\frac{5}{5} \times \frac{54}{6} - (30 \times 3)| = 207$
 چون گفته شده که متر از ۱۲ به ۱۱ باشد و ما زیادیم پس متر از ۱۲ حساب می‌کنیم
 $340 - 207 = 153 =$

الف) ۴:۱۱

$(4 \times 30) + (2 \times 11) + (\frac{11}{6}) = 11^\circ$

ب) $|5/5M - 30h| = 4:11$
 $|5/5 \times 11 - 30 \times 4| = 11^\circ$

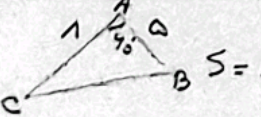

الف) $S = \frac{\alpha}{4} r^2$

$\frac{\pi}{4} \times (3^2) = \frac{\pi}{4} \times 9 = \frac{9\pi}{4}$

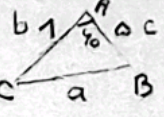

ب) $S = 2r + \alpha r$
 $(2 \times 3) + (\frac{\pi}{4} \times 3) = 4 + \frac{3\pi}{4}$
 $\rightarrow 4 + \frac{3\pi}{4}$

الف) $S = AB \times AC \times \frac{1}{2} \times \sin A$

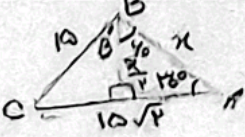

$\rightarrow S = 5 \times 1 \times \frac{1}{2} \times \frac{\sqrt{3}}{2} = 10\sqrt{3}$

ب) $a = \sqrt{b^2 + c^2 - 2bc \cos \theta}$

$\rightarrow a = \sqrt{1^2 + (5)^2 - (2 \times 5 \times 1 \times \cos 60^\circ)}$
 $a = \sqrt{29} = \sqrt{29}$
 $\text{محیط} = a + b + c = 1 + 5 + \sqrt{29} = 20$

$B + C = 150^\circ$ $BA = x \rightarrow BH = \frac{x}{2}$ $\text{مساحت} = \frac{1}{2} \times 10 \times \frac{\pi}{180} = \frac{\pi}{18}$

$\frac{10}{\sin 10^\circ} = \frac{15\sqrt{2}}{\sin B} = 30$ $\text{مساحت} = 10 \times 5 \times \frac{\pi}{180} = \frac{5\pi}{18}$
 $\sin B = \frac{15\sqrt{2}}{30} = \frac{\sqrt{2}}{2}$

$$\tan(\pi - \alpha) = -\tan \alpha \quad - \quad \forall \tan(\pi + \alpha) = \forall \tan \alpha$$
