

④ ۲، ۳، ۴ داده

$$\frac{F}{x} \times \frac{x}{\Delta} \times \frac{\Delta}{F} = 100$$

$$\frac{F}{x} \times \frac{F}{x} \times \frac{x}{F} = 4A$$

⑤

$$\frac{111}{1} - \frac{112}{2} - \frac{113}{3} - \frac{123}{4} - \frac{133}{5} - \frac{233}{6}$$

$$4 \times 3 + 9 + 1 = 19$$

۶

⑥

$$\frac{F}{x} \times \frac{x}{\Delta} \times \frac{\Delta}{F} = 40$$

$$\frac{F}{x} \times \frac{F}{x} \times \frac{1}{0} = 12$$

$$\frac{F}{x} \times \frac{F}{x} \times \frac{F}{x} = 1A$$

$$12 + 1A = 30$$

⑦

$$(9) \times (F) = \frac{9 \times \Delta}{F} \times \frac{F \times x}{F} = 18 \times 9 = 90$$

۷

⑧

$$\frac{F}{x} \times \frac{x}{\Delta} \times \frac{\Delta}{F} = 40$$

$$\frac{F}{x} \times \frac{F}{x} \times \frac{F}{x} = 1A$$

⑨

A → B

$$\frac{A!}{\Delta! B!} = \frac{A \times x \times x \times x}{1 \times x \times x} = 29$$

۸

⑩

$$\frac{x}{F} \times \frac{x}{\Delta} \times \frac{\Delta}{F} = 40$$

$$40 - 1 = 39$$

$$\frac{x}{F} \times \frac{x}{F} \times \frac{x}{F} = 10$$

$$\frac{1}{F} \times \frac{F}{x} \times \frac{1}{F} = 4$$

$$10 + 4 = 14$$

⑪

A → B

$$\frac{F}{x} \times \frac{F}{x} \times \frac{F}{x} \times \frac{F}{x} \times \frac{F}{x} = F^5$$

(5) مرتبه

۹

⑫

$$\frac{1}{F} \times \frac{x}{\Delta} \times \frac{\Delta}{F} = 10$$

$$\frac{1}{F} \times \frac{F}{x} \times \frac{F}{x} = 4$$

⑬

$$\frac{\Delta \times F}{1 \times 1} + \frac{F \times F}{F \times F} + \frac{F}{F \times F} = 24$$

۱۰
