

سوال (۱) <

$$\frac{EF}{AF} = ?$$

در مثل قائم الزامی: $\triangle ABC \Rightarrow \sqrt{9n^2 + 9n^2} = 3\sqrt{2}n = AC$

در مثل قائم الزامی: $\triangle ADE \Rightarrow \sqrt{9n^2 + n^2} = \sqrt{10}n = AE$

مستقیم $\triangle AFE \sim \triangle CFB \rightarrow \frac{AF}{EF} = \frac{FE}{FB} = \frac{AE}{BC} = \frac{n}{3n} = \frac{1}{3}$

$AF = y \rightarrow y \cdot 3y = 3\sqrt{2}n \rightarrow y = \frac{3\sqrt{2}}{3}n$

$EF = 2 \rightarrow 2 \cdot 3y = \sqrt{10}n \rightarrow 2 = \frac{\sqrt{10}}{3}n$

$$\Rightarrow \frac{EF}{AF} = \frac{\frac{\sqrt{10}}{3}n}{\frac{3\sqrt{2}}{3}n} = \frac{\sqrt{5}}{3}$$

n = ?

$\hat{AED} = \hat{ACB}$
 $\hat{A} = \hat{A}$ } $\rightarrow \triangle AED \sim \triangle ACB \rightarrow \frac{AE}{AC} = \frac{ED}{BC} = \frac{AD}{AB} \rightarrow \frac{n}{10} = \frac{4}{n+1} \rightarrow n^2 + n - 40 = 0$

$n^2 + n - 40 = 0$
 $(n+9)(n-5) = 0$
 $n = -9$ غلط
 $n = 5$

سوال (۲) <

BC = ? $DE \parallel BC$ در مثل $\triangle ABC \rightarrow \frac{AE}{AC} = \frac{DE}{BC} \rightarrow \frac{n}{n+1+4y} = \frac{DE}{FC+y}$

$4y = 8n$
 $y = \frac{2n}{1}$

$\frac{n}{n+1+\frac{8n}{1}} = \frac{DE}{FC+y} \rightarrow \frac{n}{n+1+8n} = \frac{DE}{FC+y} \Rightarrow 3DE = 3+FC$ (۱)

$DE \parallel FC \Rightarrow \frac{DE}{FC} = \frac{EH}{HF} \rightarrow \frac{DE}{FC} = \frac{n}{y} = \frac{4}{8} \rightarrow 8DE = 3+FC$ (۲)

(۱), (۲) $\rightarrow 3+FC = 8(\frac{3+FC}{8}) \Rightarrow 3+FC = 3+FC \rightarrow \frac{3}{8}FC = 3 - FC \cdot \frac{1}{8} = 3/8$

$BC = BF + FC = 3 + 3/8 = 4/8$

سوال (۳) <

$\frac{y}{n} = ?$

$n^2 = BH \times BC \rightarrow n = \sqrt{4 \times 40} = \sqrt{160}$

$y^2 = CH \times BC \rightarrow y = \sqrt{14 \times 40} = \sqrt{560}$

$\frac{y}{n} = \frac{\sqrt{560}}{\sqrt{160}} = \sqrt{\frac{560}{160}} = 2 \Rightarrow \frac{n}{y} = \frac{1}{2}$

سوال (۴) <

AF = ?

$\hat{F} = \hat{F} = 90^\circ$
 $\hat{ABF} = \hat{FEC}$ } $\rightarrow \triangle ABF \sim \triangle FEC \rightarrow \frac{AF}{CF} = \frac{BF}{EF} \rightarrow \frac{n+12}{12} = \frac{n}{n}$

$n^2 + 12n - 12n = 0$

$(n+12)(n-12) = 0$

$n = -12$ غلط

$n = 12$

$AF = n + AE = 12 + 12 = 24$

سوال (۵) <
