

$$BC \parallel DE$$

$$\frac{S_{BCE}}{S_{BDE}} = ?$$

(1)

$$h_{BCE} = h_{BDE} \rightarrow$$

$$\frac{S_{BCE}}{S_{BDE}} = \frac{BC}{DE}$$

$$DE \parallel BC \rightarrow \frac{BC}{DE} = \frac{12}{\omega}$$

$$\therefore BC \parallel DE \text{ in } \triangle ABC \quad (2)$$

$$\triangle OBF \cong \triangle MCF \rightarrow OF = MB = \omega \rightarrow FC = F$$

$$\rightarrow MF = F$$

Claris per se

$$\angle BCD = \angle ABF = \angle CAE \quad (3)$$

$$BF = FO, F = EF \rightarrow$$

$$F = AB \text{ is}$$

$$C_1 + B_1 = F$$

$$C_1 + A_1 = E$$

$$A_1 + C_1 = D$$

$$\Rightarrow OFE \sim ABC$$

$$\frac{FO}{\omega} = \frac{F}{\omega} \rightarrow \omega = 9.4$$
