

سؤال 14 تكلفت 14

$$f(x) = \mu^A x + B$$

$$y = x^\mu \begin{matrix} \xrightarrow{x=1} \\ \xrightarrow{x=2} \end{matrix} \begin{matrix} y_1 = (1)^\mu = 1 \\ y_2 = (2)^\mu = 9 \end{matrix} \Rightarrow \begin{matrix} y_1 = f(1) \\ y_2 = f(2) \end{matrix} \Rightarrow \begin{matrix} \mu^A + B = 1 \\ \mu^2 A + B = 9 \end{matrix}$$

سؤال 1

$$\begin{cases} A+B=0 \\ 2A+B=2 \end{cases} \Rightarrow A=2, B=-2 \Rightarrow f(x) = \mu^2 x - 2 \quad \xrightarrow{f(0)} \mu^2(0) - 2 = \mu^{-2}$$

$$\text{حل ناقص بالصورة} \quad \frac{1}{9}$$

$$f_y(x^2 + 1) = x + \mu$$

$$\mu^{x+\mu} = x^2 + 1 \Rightarrow (\mu^x)^\mu - \mu^x x^2 + 1 = 0$$

سؤال 2

$$\Rightarrow \begin{cases} x_1 = \ln_y \mu \\ x_2 = \ln_y \omega \end{cases} \Rightarrow S = \ln_y \mu + \ln_y \omega = \ln_y \frac{\omega}{\mu}$$

$$(\mu^x - \mu)(\mu^x - \omega) = 0$$

$$(\ln_y \mu)^\mu + \ln_y(1 \cdot \mu) \ln_y \mu$$

سؤال 3

$$\begin{aligned} (\ln_y \mu)^\mu (\ln_y \mu^{1 \times \mu}) (\ln_y \mu^{(1)^\mu \times \mu}) &= (\ln_y \mu)^\mu + (1 + \ln_y \mu) (\mu + \ln_y \mu) \\ \xrightarrow{\ln_y \mu = 1 - \ln_y \mu} (\ln_y \mu)^\mu + (\mu - \ln_y \mu) (\mu + \ln_y \mu) &= (\ln_y \mu)^\mu + \mu - (\ln_y \mu)^\mu \\ &= \boxed{\mu} \end{aligned}$$

سؤال 4

$$\ln_y(\mu^x - \mu x + 1) + \mu \ln_y(1 - \mu) = \omega \quad \ln_y(\mu x - 1)^\mu + \ln_y(1 - \mu)^\mu = \omega$$

$$\ln_y(1 - \mu)^\omega = \omega \quad (1 - \mu)^\omega = 1^\omega \xrightarrow{1 - \mu > 0} 1 - \mu = 1 \Rightarrow \mu = -9$$

$$\ln_y^{-1} = \ln_y^{-(-9)} = \boxed{2}$$

$$\lim_{x \rightarrow r} (x^r + kx + \varepsilon) + \lim_{x \rightarrow r} (x-r) = r^r$$

سوال (6)

$$\lim_{x \rightarrow r} (x^r + kx + \varepsilon) (x-r) = r^r \Rightarrow x^r - 1 = 1 \Rightarrow x^r = 1 \Rightarrow x = r \frac{\varepsilon}{r^r}$$

$$\lim_{x \rightarrow r} \frac{x^r}{\sqrt{x}} = \lim_{x \rightarrow r} \frac{x^{\frac{r}{2}}}{x^{\frac{1}{2}}} = \frac{r^{\frac{r}{2}}}{r^{\frac{1}{2}}}$$

سوال (7)

$$\lim_{x \rightarrow r} (r-x) - \lim_{x \rightarrow r} \frac{1}{(r-x)^r} = r^r \quad \lim_{x \rightarrow r} \frac{(r-x)}{(r-x)^r} = r^r \quad (r-x)^r = 1 \Rightarrow r^r$$

$$\lim_{x \rightarrow r} \frac{r-x}{\sqrt{x}} = \lim_{x \rightarrow r} \frac{r-x}{x^{\frac{1}{2}}} = \frac{r-r}{r^{\frac{1}{2}}} = 0$$

سوال (7)

$$x^r - r = 1 \Rightarrow x^r = r + 1 \Rightarrow x^r - \varepsilon x - r = 0 \quad (x-r)^r = 1 \Rightarrow 0$$

$$\Rightarrow (x-r) = \pm \sqrt[r]{\varepsilon} \rightarrow \begin{cases} \sqrt[r]{\varepsilon} & \text{قوة } \checkmark \\ -\sqrt[r]{\varepsilon} & \text{قوة } \checkmark \end{cases} \quad \lim_{x \rightarrow r} \frac{(x-r)}{x} = \lim_{x \rightarrow r} \frac{\sqrt[r]{\varepsilon}}{r} = \lim_{x \rightarrow r} \frac{1}{r} = \frac{1}{r}$$

سوال (8)

$$\lim_{x \rightarrow r} \frac{x^r}{x} = \frac{r}{r} \quad \lim_{x \rightarrow r} \frac{x^r}{1} = ?$$

$$\lim_{x \rightarrow r} \frac{x^r}{1} = \frac{r}{1} = \frac{r}{1 + r \lim_{x \rightarrow r} \frac{x^r}{x}} = \frac{r}{1 + \frac{r}{\frac{r}{r}}} = \frac{r}{1 + \frac{r}{1}} = \frac{r}{1 + \frac{r}{1}} = \frac{r}{\frac{1+r}{1}} = \frac{r}{1+r} = \frac{r}{1+r}$$

سوال (9)

$$\lim_{x \rightarrow r} \frac{x^r}{\varepsilon} = 0 \Rightarrow \lim_{x \rightarrow r} \frac{1}{\varepsilon} = ? \quad \frac{1}{r} \lim_{x \rightarrow r} \frac{x^r}{x} = 0 \Rightarrow \lim_{x \rightarrow r} \frac{x^r}{x} = 1 \Rightarrow \frac{1}{r}$$

$$\lim_{x \rightarrow r} \frac{1}{\varepsilon} = \frac{1}{\lim_{x \rightarrow r} \frac{1}{x^r}} = \frac{1}{1 + \lim_{x \rightarrow r} \frac{1}{x^r}} = \frac{1}{1 + \frac{1}{1}} = \frac{1}{1 + \frac{1}{1}} = \frac{1}{\frac{2}{1}} = \frac{1}{2} = \frac{1}{2}$$

سوال (10)

$$(a \lim_{x \rightarrow r} x^r) + a x + b \lim_{x \rightarrow r} x^r = 0 \Rightarrow \lim_{x \rightarrow r} \frac{a}{x} = \frac{a}{r} \Rightarrow (\sqrt{x})^{\frac{a}{b}} = \sqrt{x} \quad a \lim_{x \rightarrow r} x^r + b \lim_{x \rightarrow r} x^r = a \Rightarrow b \lim_{x \rightarrow r} x^r = a(1 - \lim_{x \rightarrow r} x^r)$$
